148. An assay plate for detecting the presence of a first predetermined type of oligonucleotide in a solution containing an unknown oligonucleotide, the assay plate comprising:

a fused silica substrate; and

a dried aliquot of a first known oligonucleotide, the dried aliquot covalently bonded to the fused silica substrate, the known oligonucleotide operative to bind said predetermined type of oligonucleotide upon contact with a solution containing such predetermined type of oligonucleotide.

- 149. The assay plate of claim 148 wherein said predetermined type of oligonucleotide comprises a nucleic acid and said known oligonucleotide comprises a nucleic acid.
- 150. The assay plate of claim 148 wherein said predetermined type of oligonucleotide and said known oligonucleotide comprise a complementary pair.
